MVC Architecture
Copywriting
Google Products (Drive, Docs, Sheets, Slides, ETC)
Microsoft Products (Word, Excel, PowerPoint, Outlook, Visual Studio, SQL Server, ETC)
Staff/Operations Management

PROJECTS & HOBBIES

Blog

Since 2015, I've maintained a personal site at <https://natenorthway.com>
Aside from being a place to showcase my work, I mainly use it to blog about web stuff, mostly CSS features, security, and general website building knowledge. I like to do deep dives into a lot of specific features of the web and use CodePen to build demos. I also use it to test and learn new building methods, workflows, libraries, and plug-ins. I build a lot of WordPress sites, so I decided to base my site on WordPress so that I know the product inside and out not only as a developer but as a user so I can better understand my client's questions.
